DagsHub: dagshub.com/navjyot.dataarchitect

PROFILE SUMMARY
Aspiring Data Scientist with a Computer Science engineering background and hands-on experience in building end-to-end machine learning projects. Strong foundation in Python, data analysis, feature engineering, and supervised learning models. Actively developing practical ML skills through real-world datasets, structured projects, and continuous self-learning. Seeking entry-level data science roles or advanced academic programs in data science.

TECHNICAL SKILLS
Programming: Python
Data Analysis: Pandas, NumPy
Machine Learning: Logistic Regression, XGBoost
ML Concepts: EDA, Feature Engineering, Model Evaluation, Model Intuition
Foundational Knowledge: Artificial Neural Networks (ANN basics)
Tools & Platforms: Scikit-learn, Git, GitHub, DagsHub

PROJECTS
Diabetes Prediction | Machine Learning Project
• Developed end-to-end ML pipeline including data cleaning, EDA, and feature engineering
• Trained and evaluated Logistic Regression and XGBoost models
• Evaluated performance using accuracy, precision, and recall
• Version control and experiment tracking using GitHub and DagsHub

PROFESSIONAL EXPERIENCE
Network Field Technician (Contract)
Chorus, New Zealand | 2017 – 2019
• Supported residential internet connectivity and last-mile network deployment
• Installed and troubleshot broadband infrastructure
• Followed technical documentation and safety standards

EDUCATION
Bachelor of Engineering – Computer Science & Engineering
Dr. Babasaheb Ambedkar Marathwada University | 2010 – 2014
First Class with Distinction

Diploma in Advanced Network Engineering (Level 7)
Whitireia New Zealand | 2015 – 2016

Diploma in Computer Engineering
MIT College, MSBTE Mumbai | 2007 – 2010
First Class

INDEPENDENT LEARNING
Self-studied Data Science and Machine Learning using Udemy, Coursera, and Kaggle
Solved real-world datasets and applied ML algorithms
Used modern AI tools for learning and debugging

LANGUAGES
English | Hindi | Marathi | Punjabi
